Art Unit: 1743

1. The following is an examiner's statement of reasons for allowance: examiner is interpreting the arguments in the reply filed with the request for continued examination to mean that the leave one out method is not within the scope of the cross-validation set. In addition it is noted that step b) requires the separation of the entire set into two groups of about half of the spectra in each with the linear discriminant analysis being performed on a first of the two groups and the cross-validation of the result being performed on the second group. The leave one out method of the references does not teach this or fairly suggest the claimed cross validation method. Additionally, if the separation of the spectra by Somorjai into training and test groups and running the analysis on the training groups followed by testing the parameters on the test group can be considered a cross validation procedure, the claims are distinguished from the art based on the claims requiring the entire set of spectra to be divided into two groups with about half of the spectra in each. In Somorjai, multiple groupings of the 107 samples are made but Somorjai does not group the entire set into two groups but only uses subsets of the entire group. Additionally the subsets used by Somorjai are selections of different portions of the spectra based on the inclusion of specific samples known to have a particular type of disease state. This also does not teach or fairly suggest the claimed cross validation step in the method. Additionally the newly cited references teach the use of a bootstrap method to validate a method, but do not teach or fairly suggest the use of the linear discriminant analysis and the validation method as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

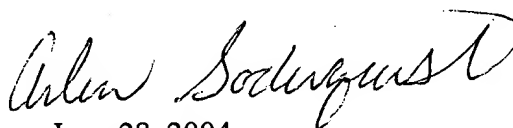

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited art pertains to the bootstrap method of validation.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arlen Soderquist whose current telephone number is (571) 272-1265 as a result of the examiner moving to the new USPTO location. The examiner's schedule is variable between the hours of about 5:30 AM to about 5:00 PM on Monday through Thursday and alternate Fridays.
